Short Bio

I am a graduated student in the CS visual computing group at Tel-Aviv University, where I work under the supervision of Prof. Daniel Cohen-Or. I obtained my B.Sc in Electrical Engineering from Tel-Aviv University. My research is focused on exploiting deep learning techniques to bridge the gap between images and video. I am experienced in optimization and processing of satellite images as an engineer in the Israeli Aeronautical Industry, and I served as an officer in the visual department of IDI. Furthermore, I spend my free time on photography and singing.

Education

Direct path in Electrical Engineering, Tel Aviv University 2018-present

Research areas: Deep Learning, Computer Vision, Computer Graphics

Supervision: Prof. Daniel Cohen-Or

GPA: 92.64

B.Sc. in Electrical Engineering, Tel Aviv University 2014-2018

I was selected for direct M.Sc. track program for excellent B.Sc. students.

Specialization on: Communication, Control, Signal processing

GPA: 86.5

Experience

Teacher assistant, Tel-Aviv University, 2018-present

Signals and systems course

Discrete signal processing course

Software engineer, Image processing team, IAI 2017

Student position. Developing a post-processing system for satellite images at Israel Aerospace Industries, space department.

Software QA engineer, Satellite operating team, IAI 2015-2017

Student position. Responsible for validating systems of tracking and monitoring the satellite's equipment and performance in orbit.

Performed manual testing and wrote daily test plans for satellite operation systems.

Product manager, first lieutenant, Satellite unit, IDI 2012-2014

Responsible for characterization, testing and launch of satellite control and operation systems.

Coordinated with the operational unit and IAI, and lead project manager in product development, testing and validation.

Officers course, 2012**Satellite operator, Satellite unit, IDI 2010-2014**

Responsible for daily mission planning of satellite operations.

Programming Language experience

Python, Pytorch, MATLAB, C, linux, CUDA

Languages

Hebrew – mother tongue

English – fluent

Skills

Ambitious, creative, self-learner, people person, responsible
